

Yokohama Advan AO48 High Performance Street / Track Tires

SINGLE BLOCK DESIGN

The entire tread surface is one continuous tread block, which increases stiffness, enhances cornering and optimizes power transitions during acceleration and braking. This continuous design ensures constant contact with the road, delivering a better “on-center” feel and responsive steering.

ROUNDED CASING DESIGN

Developed for racing applications, this unique tread profile quickly and easily transitions from straight-line sprints to high-speed cornering, enabling predictable handling.

STATE-OF-THE-ART, RACE-READY COMPOUND

ADVAN A048 compounds deliver phenomenal grip under a broad range of temperatures.

M-COMPOUND

Specifically designed to help lower lap times in short-track competition.

MH-COMPOUND

Designed to deliver durable track-day performance.

Please contact our sales department to purchase your next set of high performance street or track tires.
